To: EIS Office

U.S. Department of Energy, Office of Civilian Radioactive Waste Management

[It's very important that I speak up against Yucca Mountain, and speak up to this issue so this dump is not just dumped on us, here in Nevada. It is not the answer.]

Your The (DOE) idea is to simply just transport 24/7 for many years through 39 other states to Yucca Mountain only a mere 90 miles away from metropolitan Las Vegas Nevada 77,000 tons of the most deadly , highly readioactice nuclear wastemaking the routes desasor zones and highly terrorist targets, Also you want to choose politics over science as over 230 top well regarded scientists have spoken against Yucca Mountrain!!!!

It is also very flawed as there is active volcanos in the area and Yucca Mountain sits on and near 23 earthquake fualts. As Nevada has the sole reputatrimon of being one of the mostb earthquake zone states in the United States.

How can the DOE be for more nuclear power plants when we haven't learned a way to dispose of the waste from the

serious subject for our state, that Nevada cannot afford to allow our state be come the United States Nuclear Dumping Ground !!!

in the 1950's and 1960's we payed our price when the Government lied to us while dropping atom bombs 50 miles away thousands upon thousands got cancer from our Governemnts lies ,bnack then , so I willl nort believe anything the present administration says on the safety of Yucca Mountain!]

- 2 [As an ardent Opponent I and many others are fighting and have already fought successfully to stop the document approval process once because the collection was incomplete and could not be searched. The Department of Energy has added some documents but still Department of Energy chooses to omit critical information and the collection making it extremely difficult to research.

The state of Nevada has filed a motion to again deny the certification.]

- 1 [One more time I must stand up and just say "No!" to transporting and burying high level nuclear waste in Nevada.]

- 3 [All three EISs are profoundly flawed in many ways; the only acceptable course of action is to choose the no action alternatives in all three EISs.]

- 1 [The best solution to our nuclear waste problem is to stop manufacturing it right now and to containerize it as safely as possible, as close as possible to its generation site.!] ]

These comments pertain to (1) Draft Supplemental Environmental Impact Statement for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada (Draft Repository SEIS) and

(2) Draft Supplemental Environmental Impact Statement for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada -Nevada Rail Transportation Corridor (Draft Nevada Rail Corridor SEIS) and Draft Environmental Impact Statement for a Rail Alignment for the Construction and Operation of a Railroad in Nevada to a Geologic Repository at Yucca Mountain, Nye County, Nevada (Draft Rail Alignmentment).

- 2 [As one of the Opponents we have already fought successfully to stop the document approval process once because the collection was incomplete and could not be searched. The Department of Energy has added some documents but still omits critical information and the collection is still very difficult to search. The state of Nevada has filed a motion to again deny the certification. Yucca Mountain opponents and advocates will present their arguments at this meeting.]

- 1 [As an Nevadan, and as an Proud American I one more time just say "No!" to transporting and burying high level nuclear waste in Nevada.]

Transporting  
and burying high level nuclear waste in Nevada.

- 4 [All three EISs are profoundly flawed in many ways; the only acceptable course of action is to choose the no action alternatives in all three EISs.]

The best solution to our nuclear waste problem is to stop manufacturing it

right now and to containerize it as safely as possible, as close as possible to its generation site.!

Sincerely,  
John Marchese
